

# Biola Bed Heights

Below are some bed heights offered to residents of the University. The furniture shown is for demonstration purposes only. Numbers are approximate.

This is a **standard height bed**. Standards offer a comfortable height but limit the amount of storage available under the bed.

Height (floor to bottom of rail): 2'

This is a **bed at the lowest setting**. This bed style is very close to the ground and offers very limited storage space.

Height (floor to bottom of rail): 9"

This is a **captain height bed**. The dorm furniture provided is built to fit under a captain.

Height (floor to bottom rail): 31"

This is a **lofted bed**. All lofted beds come with a safety rail as illustrated. Lofts save space the most space, but residents have to climb into bed.

Height (floor to bottom of rail): 5' 9"

Please remember that your room is a shared space. Include your roommates while planning your room's set-up. In triples, it may be difficult to fit anything lower than a captain. See reverse side for additional options.

# Biola Bed Heights

Below are some bed heights offered to residents of the University. The furniture shown is for demonstration purposes only. Numbers are approximate.

This is a **captain height bunk**. The dorm furniture provided is built to fit under a captain. Many residents find they cannot sit up in a captain bunk.

Height (floor to bottom rail): 31"

This is a **standard height bunk**. Standard bunks' bottom bed offers a comfortable height but limits the amount of storage available under the bed.

Height (floor to bottom of rail): 2'

This is a **bunk with the bottom half at the lowest setting**.

Height (floor to bottom of rail): 9"

A bunk bed is a shared bed. Residents need to speak to their roommate before requesting to bunk their beds.
